Kamla Nehru Higher Secondary School   **2018 − 2019**
*10th - **71.8%***   *Bhopal, India*

CERTIFICATIONS

Foundations of Cybersecurity

PROJECTS

Blog App | MERN stack

Blog App is a full-stack web application built using the MERN stack (MongoDB, Express.js, React, Node.js). It allows users to create, edit, and delete blog posts with authentication and authorization. Features include a rich text editor, user profiles, comments, and a responsive UI for seamless browsing and interaction.

Employee Management System | React.js

Developed an Employee Management System using React.js that features two types of user logins: Admin and Employee. The Admin has the ability to assign tasks to employees through a dedicated dashboard, while employees can view their assigned tasks and update the status as either "Done" or "Pending" based on their progress. The application includes role-based access control to ensure that each user only sees the features relevant to their role .

INTERNSHIP

Wyreflow Technologies **   **March 2025 − May 2025
Frontend Developer Intern

- Worked on a Job Portal website where I was responsible for designing and developing user interfaces. My primary focus was on creating responsive and visually appealing layouts to ensure a seamless user experience across different devices and screen sizes.
